Emmanuel Thanassoulis (Aston University)

The Data Envelopment Analysis Journal, the official journal of the International Data Envelopment Analysis Society, publishes theoretical and applied research advancing the use of Data Envelopment Analysis (DEA) as a methodology for improving organizational performance. The journal's aim is to provide a channel for communication of new ideas and new insights about the design and use of DEA models.

The journal has a broad scope spanning all areas of analytical and empirical research related to the theory and practice of DEA. It draws on methods from management science, operations research, economics, statistics and other related disciplines. The journal publishes articles on new or improved models for DEA and computational techniques to analyze those models more efficiently. The journal also publishes applications of DEA models in novel ways, and is particularly interested in actual implementation of DEA in organizations. Articles on DEA applications draw on related themes from social and organizational sciences and various functional disciplines in business and management.

This special issue is devoted to the best papers presented at the DEA2012 conference in Natal, Brazil.

Manuscript Preparation

Please refer to the Journal website at <http://www.DEAJournal.com> for Author Guidelines and additional information on manuscript preparation. All manuscripts should be submitted online at <https://editorialexpress.com/deaj>. When submitting the manuscript please mark it as "DEA2012- Special Issue".

IMPORTANT DATES

15 January 2013	→	Submission Deadline
15 July 2013	→	Notification of review outcome
15 October 2013	→	Revised manuscripts resubmitted for review
15 December 2013	→	Notification of acceptance or rejection of paper
15 January 2014	→	Final version of paper submitted

Notes for Prospective Authors

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Submitted papers will be peer-reviewed in the same manner as any other submission to a leading international journal. The major acceptance criterion for a submission is the quality and originality of the contribution.
